DECLARATION OF COMPLIANCE WITH THE EUROPEAN PACKAGING AND PACKAGING WASTE REGULATION (PPWR)

Tecnica Tre S.r.l., as part of its commitment to quality, environmental sustainability and compliance with applicable legislation, has implemented and established a process for the verification and qualification of the packaging used in its business activities, in accordance with Regulation (EU) 2025/40 of the European Parliament and of the Council on packaging and packaging waste (Packaging and Packaging Waste Regulation – PPWR).

The Regulation introduces new requirements concerning sustainability, composition, recyclability, labelling and packaging management, with the aim of reducing environmental impact and promoting the circular economy.

Considering its role within the supply chain, Tecnica Tre S.r.l. has collected and reviewed the technical documentation relating to the packaging used and marketed, distinguishing between the different responsibilities established by the legislation:

- **Packaging imported from non-EU countries:** when acting as an importer, Tecnica Tre verifies the technical documentation and declarations of conformity provided by its suppliers, ensuring compliance with the obligations falling within its responsibility.
- **Packaging manufactured under the Tecnica Tre brand:** for packaging produced by third-party suppliers and marketed under the company's own brand, Tecnica Tre assumes the role and responsibilities of the manufacturer, pursuant to Article 21 of Regulation (EU) 2025/40.

The management of the company's packaging is subject to a process of documentary control and verification of the applicable requirements, in accordance with Regulation (EU) 2025/40 and the relevant European and national legal provisions.

Technical documentation and evidence of conformity are retained by the company for the legally required period and made available to the competent authorities in accordance with applicable legislation.

Tecnica Tre S.r.l. therefore reaffirms its commitment to ensuring the responsible management of packaging, in full compliance with the regulatory obligations and environmental sustainability principles established by the European Union through the aforementioned Regulation.
